

MARINE ENVIRONMENTAL SERVICES

Vision: We are your trusted expert in marine monitoring and surveillance

Mission: Your partner in solving complex marine problems, powered by innovation and expertise

Combining extensive local experience and strong collaborative partnerships, we offer a range of environmental services that are tailored, innovative, cost-effective and culturally appropriate.

We use local, experienced operators who have a deep understanding of the environment, equipment and processes that work in the Top End and around Australia. It's part of our commitment to better understanding Australia's northern oceans and building deeper connections to develop long-term capability in our region.

▶ The Value We Bring

We offer a local, independent marine monitoring service in Australia's Top End

Pioneers in innovative ocean monitoring techniques, including uncrewed surface vessels and automated monitoring systems

Empowering local communities for better weather and climate monitoring in the Northern Territory

Strong connections with local, national, and international partners, including researchers, Indigenous groups, and government organisations

Our Approach

Listen

We first listen to understand the challenge, the required expertise, and key cultural, political, and environmental considerations. Understanding the desired outcome from the outset allows us to determine the most effective and efficient approach for the community and our clients.

Collaborate

Led by our qualified experts, we partner with suitable stakeholders to develop tailored solutions that meet client requirements and address local considerations. We leverage specialist skills and local expertise, with a deep understanding of the environment, equipment, and processes suited to the region.

Deliver

Once a solution has been devised, we deploy, monitor and report, and adapt to achieve the outcomes to a high standard. From data collection and environmental impact assessments to advisory services, research collaborations and strategic planning – we offer a full range of environmental solutions.

Our Services

Marine data collection, analysis and interpretation

Marine environmental advisory services

Advanced oceanographic monitoring using robotics and autonomous systems

Planning and implementation of long and short-term marine monitoring

Physical and ecological oceanographic research

Growing specialist marine consultancy capability in the NT

Comprehensive, enduring solutions

Solving complex problems through an ethical, trusted and logical approach, Elysium EPL is a professional services firm trusted to help clients realise their vision, and convert their ideas to lasting outcomes.
