

# CRITICAL INFRASTRUCTURE AND ASSETS

**Empowering clients to optimise  
their assets.**

Our multi-disciplinary team offers a range of asset and infrastructure optimisation and integration services.

We draw on our experience across Defence, government and industry to help organisations succeed through the provision of subject matter advice, targeted asset and engineering support and the knowledge transfer necessary to build our client's capability.

## ▶ The Value We Bring

Experienced in rigorous testing and evaluation to support seamless integration of new products, services, and capabilities.

We offer valuable insights, enabling our clients to make informed decisions to optimise and enhance their processes.

Degree-qualified engineers, scientists and economists with industry currency.

## Our Approach

Our approach ensures that we fully understand your needs, carefully plan the best course of action, and expertly deploy solutions that meet your objectives.

### Understand

We begin by gaining a deep understanding of your desired outcomes. This critical step ensures that our approach is tailored to meet your goals.

### Plan

We develop a strategic plan that involves crafting Statements of Work, designing processes and procedures for complex reform programs, and conducting analytical assessments of critical infrastructure and assets to inform future planning.

### Deploy

To ensure the smooth transition and delivery, we rigorously test and evaluate so that the implemented solutions meet your objectives and drive long-term success.

## Our Services

 Infrastructure and Asset acquisition, Operations and Maintenance (O&M)

 Security of Critical Infrastructure (SOCI) and Critical Asset Services

 Requirements Development and Tendering Support

 Technical Bid Support

 Transition and Delivery

 Technical Regulatory Development and Implementation

 Technical and Analytical Asset Assessments

 Advice, Risk Assessments and Remediation Plans

I would like to thank Elysium for the engagement in this program of works. It has been first class and I have appreciated your honesty and approach to the significant issues presented. Compared to some of your much larger competitors, this engagement has been seamless and will provide long term benefits for the AFP.
