

# SECURE FACILITIES

Now, more than ever, security is of utmost importance.

Our experienced security professionals offer solutions and services that ensure classified work and conversations can be conducted safely, securely and uninterrupted in accordance with national standards. We can manage the entire process and all of its complexity to deliver a ready-made or custom solution that meets your needs.

This includes:

Secure deployable facilities

Secure fixed facilities

Expert guidance and project management

## ▶ The Value We Bring

A range of flexible options that can be tailored to meet your individual needs and classification requirements

Deep expertise in the design, construction and accreditation of secure facilities, including all related process requirements

Track record of delivering facilities in accordance with ASIO Technical Note 1-15 and 5-12 and the Information Security Manual (ISM)

## ▶ Our Approach

### Understand

We take the time to understand your outcomes, specific needs and requirements, alongside the minimum standards required by the relevant authorities.

### Plan

We assess and devise a tailor-made solution based on our understanding, and provide advice on the process to achieve your outcomes.

### Deploy

Once a solution is agreed, we manage the process with full service, including liaising with authorities, project management of design, construction and fit out, as well as secure access and DISP-accredited logistics providers.

## ▶ Our Services

Project Management of Custom Builds

Security Risk Assessments

Security Standing Orders

Standard Operating Procedures

Security Questionnaires

Advice on Suitability and Usability of Areas

Review and Advice on Uplift of Design and Security
